Education

Manipal University Jaipur , B.Tech in Computer Science	2022 – 2026
CGPA: 8.82	
IISC Bangalore , Computer Science and Automation	2025
Summer School on Approximation Algorithms	
Sanskriti School, New Delhi	2022

Work Experience

Software Development Intern , Razorpay – Bangalore	Aug 2025 – June 2026
Engineered and shipped full-stack features across 15+ microservices at Razorpay — including a self-serve risk alert platform, a TiDB+DataLake payment lookup migration, and E2E test infrastructure built from zero — delivering 500+ contributions over 10 months.	
Backend & Touchpoint Engineering Intern , Referrush – Bangalore	Jul 2025 – September 2025
Built scalable messaging infra (50+ brands, 1M+ daily messages) using Cloud API for whatsapp, SMTP for email & SMS using Firebase Functions; automated campaign dispatch, abandoned cart pings, and dynamic follow-up cadences.	
Backend & Systems Intern , ASR Aviations – Jaipur	Mar 2025 – Jul 2025
Deployed a secure POP3/SMTP mail system (10K+ daily emails) with SSL & reverse proxy with the custom domain: @asraviation.com; set up a reverse proxy and SSL authentication using Nginx on Ubuntu, hosted on KVM-2 in Hostinger.	
Backend & DevOps Intern , Software Development Center – Jaipur	Aug 2024 – Jan 2025
Developed a full-stack Wall-of-Fame portal with Next.js (frontend & backend) and MongoDB, hosted on Vercel.	
Research Intern , DRDO, GTRE, Advanced Software Engineering Lab – Bangalore	May 2024 – Jul 2024
Conducted research and engineered an optimized square root algorithm, slated for publication as a research paper	
Full Stack Development Intern , Skello – New Delhi	May 2023 – Jul 2023
Developed a backend solution and a generative AI wrapper to streamline administrative tasks	

Projects

Dell Hackathon: Smart Navigator React-Native	Oct 2023 – Jan 2024
Led frontend development for the Smart Navigator project in the 3-month Dell Hackathon; won 1st place among 20 teams — see the post here	
Health Dome Python-Flask, React, Docker, IoT	Jul 2024 – Oct 2024
Among the top 3 teams out of 250 in Smart India Hackathon 2024; led backend, DevOps, and IoT development to streamline OPD processes, and ideated a patent-pending hospital bed queuing model — see post here.	
Discord Bot: Stella Python, Discord.py	Oct 2021 – Present
Created and maintained a Discord bot (Stella) for international use with payment integration	
Pathfinding Visualizer Python, matplotlib	May 2024 – Jun 2024
Designed a pathfinding visualizer to support research in machine learning-based algorithms. Check it out here	

Achievements

• GATE CS '25 - IITR AIR 1,852 - Top 1%	2025
• Topper Certificate: Design and Analysis of Algorithms - IITM Top 2%	2024
• Secured 1st place in the on-campus Dell Hackathon	2024
• Recognized on the Dean's List for the highest GPA in the 2nd & 5th semester	2023 & 2024

Skills & Technologies

Programming Languages & Frameworks: Python, Go, JavaScript (React Native, Next.js), C (OS-level), Bash, Java
Tools & Technologies: Firebase Functions, Docker, Git, Linux (Wayland), MongoDB, SQL, Redis, REST/grpc/graphQL APIs, Nginx, Terraform Kong, TUI/CLI tools creation and usage, Kubernetes
DevOps & Infrastructure: Vercel, Hostinger (KVM), SMTP/POP3, Reverse Proxy, SSL, Cloud Messaging APIs (SMS & WhatsApp BSP)

Certifications

- | | |
|---|--|
| • 2x Gate Qualified in Computer Science | • Design And Analysis of Algorithms - IITM, TOP 2% |
| • IBM Data Science Professional Certificate | • Full Stack Development - Geeks for Geeks |
| • Google Cloud Computing Foundations | • Data Analysis with MATLAB - Vanderbilt |
